

E-Scooter FW101

25.2V 250 Watts

4.400 mAh Li-ION

6.5" - 5.5"

Max. 23 km/h

8-10 Km Distance

Max. Load 90 Kg

Product Info

The FW101 Scooter is driven by a high performance 25,2V wheel hub motor on the rear wheel and therefore easily performing maximum speed of 23 km/h with a range of 8-10 Kilometers. The throttle enables acceleration with the right thumb to the desired speed.

For slowing down speed, just loose the accelator and additionally activate engine brake, or use mechanical brake on rear wheel. The spring mounted front tire works shock-absorbing and therefore enhances driving comfort. The display on the adjustable handlebar shows battery status, Speed, driven Kilometers and time.

The scooter uses 3 speed settings, which can be navigated through the display. The FW101 can be folded and with only 7,6kg weight it is very easily carried or take away. The FW101 is available in black or white color.

Technical Specification:

- Engine power: 25,2V / 250 Watt
- Charging voltage: 29,4V DC 1.5A
- Battery: LI ION 25,2V 4400mAh
- Max. range: 8-10km
- Max. speed: up to 23 km/h
- Max additional load: 90 kg
- Tires: solid rubber, 6,5 Inch front; 5,5 Inch back
- Gradeability: 20°
- Charging time: 3 hours
- Weight: 7,6 Kg

Package content / Equipment:

- Charging adapter
- Manual
- LED rear light
- Reflection strip
- Stand

Optional:

- Bell
- LED light for front
- Mobile phone (Smartphone holder)
