X4

RM PLUS

600/800/1000/2000/3000 VA

X4 RM Plus range (19" rackmount UPS), is ideal to efficiently protect the power supply to the data processing hardware and your data against damage caused by electric disruptions.

High-performance protection

Equipped with **Line Interactive technology** controlled by microprocessor, X4 RM Plus range offer to your devices an effective and **high-quality protection**.

In the event of a power cut, the connected devices are powered on until 65 minutes depending on the connected load, that ensure continuity of service and, if necessary, allows the save of the essential data.

Cost-effective and green functions

- Built-in charger reducing the battery charging time and enabling them to be charged to 90% capacity in just 4 hours. In this way, a maximum recharge can be guaranteed between successive power cuts
- X4 RM Plus **automatic restart** when mains power restored
- **Cold start feature** for start-up with no power supply
- Batteries charge up as soon as there is a power supply
- These feature allow to the X4 RM Plus to **saves 50% more energy** than a normal UPS

Cost-effective and green functions

Each model is equipped with **IEC and FR/SCHUKO outlets**.

USB communication port enable remote control of the UPS using InfoPower software (see description on back) which also manages automatic extinction in the event of a long power cut.

X4 RM Plus offer Tel/ADSL line protection thanks to its **connectors RJ45**.

Essential assets

- A single On/Off switch
- An LCD screen shows the detailed status of the UPS
- Thanks to its rack format, X4 RM Plus can be easily integrated in a 19" rackmount server cabinet

PC & Mac*
