

USB Line Extender

Model
171632

Put USB devices within convenient reach.

The MANHATTAN® USB Line Extender is a convenient way to bridge the distance between a USB device and a PC host without signal loss. Consisting of a master and remote unit, it uses patented Application Specific Integrated Circuits (ASIC) with a Cat5e network cable (not included) to connect, process and repeat USB signals. The master and receiver units can also be used separately to customize cables of any length up to 45.7 m (150 ft.).

Offers Flexibility for Any USB Device

Use the MANHATTAN USB Line Extender to overcome the USB distance restriction and expand device and PC locations and better organize productive office arrangements. The MANHATTAN USB Line Extender can help extend a USB keyboard and mouse during presentations, operate a barcode scanner in retail point-of-purchase applications, access a printer in another room and improve other USB device placements without signal loss or interference.

Easy to Install and Transport

Small, lightweight and portable with no external power supply or drivers required makes it ideal for travel and use almost anywhere. Plug and Play capability and Windows and Macintosh compatibility make installation easy and quick.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
171632
