

LogiLink®

Bluetooth Audio Transmitter and Receiver

Art. No.: BT0062

A couple is shown from behind, sitting on a bed and watching a TV. The TV displays a herd of zebras. The woman is wearing headphones, and the man is wearing headphones. A LogiLink device is on a table in front of them, connected to the TV. Blue wireless signal icons are shown between the device and the headphones. In the top right corner, there is a 'Dual-Link' icon showing two headphones connected to a single source.

Upgrade Your Home Entertainment System

A convenient way to add Bluetooth streaming functionality to your home entertainment system or stream music to your Bluetooth headphones and speakers. Enjoy the quality of your home stereo wirelessly and bringing freedom and comfort into your home.

Never Lose a Connection

Pair your device faster without dropping the signal; provides a stable and seamless listening experience.

Convert Your Old Entertainment System

Use as a transmitter to wirelessly stream audio from your TV to Bluetooth headphones/speakers, or as a receiver to enable stream music from your phone or tablet to your soundbar.

- Ⓐ **Transmitter Mode (TX):** Connect any of non-bluetooth devices to your one or two bluetooth headsets/speakers.

- Ⓑ **Bypass Mode:** Connect the TV and speakers via wires directly. You could switch between wired (bypass mode) and wireless (bluetooth mode) with just one switch.

- Ⓒ **Receiver Mode (RX):** Connect any of your old speakers to your bluetooth enabled devices and stream crystal clear audio.
