IDE to SATA 150 Converter

Converts any IDE Drive to a SATA 150 Controller
Model
170598

Gives legacy IDE drives new levels of SATA performance.

MANHATTAN® IDE to SATA 150 Converter easily connects an IDE drive with a SATA 150 host controller. Designed to quickly mount onto most hard disk, DVD and CD drives, technicians can save upgrade costs and extend the service life of existing IDE devices with new, practical uses. With its multiple drive connection types, MANHATTAN IDE to SATA 150 Converter helps increase system versatility and functionality with IDE and SATA interoperability. Supporting SATA 150 data transfer rates of up to 1.5 Gbps and large drives over 137 GB, the MANHATTAN IDE to SATA 150 Converter is an effective solution for installing legacy IDE devices into newer SATA computers.

Lifetime Warranty
Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.
